

Diaa Mohamed

Senior Mobile Application Developer

✉ mdiaa7788@gmail.com ☎ 01023170331 📍 Cairo, Egypt 🎂 DOB: 02.04.1991

PROFESSIONAL SUMMARY

Result-oriented Senior Mobile Application Developer with 15 years of professional experience specializing in Flutter, Android SDK, and iOS development. Proven track record of delivering robust, user-centric mobile solutions across real estate, fintech, and pharmaceutical sectors. Adept at driving software development lifecycles, optimizing app performance, and implementing clean architectures to enhance user engagement.

PROFESSIONAL EXPERIENCE

Flutter Developer

2021 – Present

Booking Real Estate

Cairo, Egypt

- Designed and developed real estate mobile applications using Flutter for both Android and iOS platforms.
- Integrated real-time database search, dynamic mapping, and localized booking systems.
- Optimized app rendering performance, state management, and asset loading pipelines.

Android Developer

2020 – 2021

Sico Technology

Cairo, Egypt

- Developed native Android applications tailored to mobile devices and integrated custom hardware features.
- Collaborated with QA teams to identify, reproduce, and resolve critical performance bottlenecks.

Android & iOS & Flutter Developer

2017 – 2020

Al Safar & Partners

Cairo, Egypt

- Built cross-platform solutions alongside native applications to serve diverse client portfolios.
- Implemented secure user authentication, offline local database synchronization, and push notifications.

Android & iOS Developer

2014 – 2017

Diamonds Venture

- Created custom utility and enterprise mobile software focusing on clean UI/UX rendering.
- Managed app store deployments and maintained codebase updates for system version changes.

Android Developer

2013 – 2014

Nasr Company for Pharmaceutical Industries

- Developed internal monitoring tools and inventory management applications for Android tablets and handheld scanners.

Freelance Mobile Developer

2013 – Present

Self-Employed

- Delivered over 15 customized Android, iOS, and Flutter applications to clients worldwide.
- Gathered business requirements, drafted technical project layouts, and handled backend server integrations.

Android Developer

2010 – 2013

Al Taawn Company

- Developed basic utility applications, custom UI components, and integrated third-party APIs.

TECHNICAL SKILLS

Mobile Development: Flutter (Dart), Android SDK (Java & Kotlin), iOS SDK (Swift), Cross-Platform & Native Development

UI/UX & Design: Mobile UI/UX Design, Wireframing, Prototyping, Figma, Adobe XD, Zeplin, User-Centered Design (UCD)

Architecture & State: BLoC, Provider, GetX, Clean Architecture, MVVM, MVC, Performance Optimization

APIs & Databases: RESTful APIs, JSON, Firebase (Auth, Firestore, Push Notifications), SQLite, Local Data Syncing, Generative AI Integration (Gemini & OpenAI APIs)

Tools & Publishing: Git, GitHub, App Store Connect, Google Play Console, CI/CD Pipelines, AI-Assisted Development (GitHub Copilot, Cursor)

KEY PROJECTS

Acadimiat Central Manager (Ecosystem Administration Platform)

Flutter, Dart, Clean Architecture, REST APIs, Statistics & Charts, SVG Integration

Developed the central administration companion application for the Acadimiat ecosystem. Designed for platform administrators to manage multi-tenant academy registrations, view global financial stats and charts, approve/reject new academy registrations, and configure global subscription tiers.

Acadimiat Manager (Academy & Subscription Platform) [↗](#)

Flutter, Dart, BLoC, REST APIs, Firebase Cloud Messaging, SfCharts, PDF Printing

Developed a comprehensive management system for educational academies. Designed and implemented subscriber management flows, custom coupon configurations, real-time push notifications using Firebase Cloud Messaging, PDF report generation, and financial analytics dashboards utilizing interactive charts.

AI-Tameem Sales Agent (Wallet & Balance Management System)

Flutter, Dart, REST APIs, SQLite, QR Code Scanner

Developed the companion sales agent and wallet application for the AI-Tameem distribution network. Designed for company sales representatives to collect payments, perform instant merchant balance top-ups/withdrawals, and monitor distributor log data on the go.

MuslimDo (Mosque Directory & Prayer Booking System) [↗](#)

Flutter, Dart, Geolocation, REST APIs, SQLite, Local Notifications

Developed a specialized utility application during the COVID-19 pandemic to manage mosque capacities and prayer bookings. Designed a comprehensive mosque directory showing operating hours, integrated GPS geolocation to find nearby mosques, and built a real-time reservation system for daily and Friday (Jummah) prayers to ensure social distancing compliance.

ICTV (Talent Streaming & Media Platform) [↗](#)

Flutter, Dart, REST APIs, Video Streaming SDK, Firebase

Designed and developed a video/audio streaming and content publishing platform for creative talents and artists. Implemented HLS media streaming integration, user subscription management, interactive talent feeds, and push notifications to maximize engagement.

Salam for Values (سلام للقيم) [↗](#)

Flutter, Dart, Firebase, Local Databases

Developed "Salam", an educational and personal growth application focused on Islamic values. Designed an interactive value-study curriculum, visual progress tracking trackers, interactive daily challenges, and a highly polished UI/UX matching modern design patterns.

OTHER NOTABLE PROJECTS

- **Guidist** (*Flutter, Dart, Payment Gateways*) – International visa processing, global sports events ticketing, and interactive city tourist guides booking system.
- **SicoCare** (*Android SDK, Java, REST APIs*) – B2B logistics app for sales delegates featuring target progress tracking, warehouse ordering, collection, and device maintenance checklists.
- **AI-Tameem POS System** (*Android SDK, Java, Bluetooth Printer SDK*) – B2B Point of Sale terminal app for merchants to sell recharge cards and game top-ups.
- **Wain App** (*Flutter, Geolocation, Google Maps API*) – Location-based mall directory and shopper coupon deals manager for Dubai, UAE.
- **Legal Advice** (*Android SDK, Java, Firebase*) – Law firm digital client consultation booking and document upload management application.
- **Mo3dat Shop** (*Android SDK, Java*) – Marketplace application for listing, buying, and renting heavy machinery and construction equipment.

** Plus 15+ other commercial mobile applications developed as a freelancer and contractor since 2010.*

EDUCATION

Computer Science Egyptian Aviation Academy	2008 – 2011
High School Certificate Shebin Al-Qanater High School	2005 – 2007
